

Dear SIEF Member,

Availability of LoAs for the substance ZIRCONIUM ACETATE

The Lead Registrant MEL Chemicals in collaboration with the Members of the MOZO Consortium has prepared the lead registration dossier for the substance ZIRCONIUM ACETATE (CAS 7585-20-8; EC 231-492-7). The lead registration dossier has already been submitted to ECHA.

The LoAs are available for all relevant tonnage bands. The Consortium made its best efforts to make the LoA-prices consistent with the Regulation (EU) 2016/9 of 5 January 2016 on joint submission of data and data-sharing in accordance with Regulation (EC) No 1907/2006 of the European Parliament and of the Council concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), L3/41, 6.1.2016.

The LoA prices take into account:

- A cost-sharing model
- The actual costs and expenses incurred to establish or maintain the registration dossier
- Provisions for future costs
- The estimation of the number of co-registrants per tonnage bands as obtained from the SIEF survey of mid-2016.
- A reimbursement mechanism.

(¹): based on the Survey of mid-2016 and including the LR and the Members of the Consortium

The LoA-prices indicated in this communication are based on the elements currently available and may be subject to change in view of changes in costs or other changes in circumstances.

As foreseen in the above mentioned regulation, a yearly documentation will be established containing the recalculation of the LoA prices taking into account of the actual number of LoA sold per tonnage bands as well as the actual use of the provisions foreseen for future cost). The yearly documentation will be established for a period of 12 years after the last submission of data regarding the above mentioned lead dossier. At the end of this period, the final reimbursement will take place (if any). If the price of the LoAs is recalculated every year, the sales price remains unchanged and equal to the initial price during the whole 12-years period. No reimbursement below €1000/ LoA unless the related administrative costs are paid by the requesting party.

It is not possible to estimate exactly the provisions for future costs. The amounts considered for the provisions for future costs are therefore subject to a potential revision over time. The members of the Consortium will evaluate at a later stage whether the price of the LoAs are still in line with the current and future expenses foreseen for maintaining the registration dossier. If necessary, an additional amount may be invoiced by the Project manager on behalf of the Lead Registrant.

For on-site or transported intermediates manufactured and used under SCC (Strictly Controlled Conditions) below 1000 tpy, it is possible to refer to the joint submission for 10% of the LoA cost of an Annex VII dossier, with a minimum lump sum of €1500,00 (One Thousand Five Hundred Euro). There is no reimbursement mechanism foreseen for the case of on-site or transported intermediates.
